

MINT – Developer Documentation

A Platform to Bridge Opportunity Gaps in Saudi Arabia

1. Project Milestones

Milestone	Description	Deliverables
M1 – Requirement Analysis & Architecture	Define business requirements, confirm workflows (candidate → receptionist → process agent → accounts → company), finalize data storage policies (archival, retention).	SRS (Software Requirement Specification), ERD, API specifications.
M2 – UI/UX Design	Role-based dashboard mockups (Receptionist, Process Agent, Accounts, Super Admin). Candidate profile forms, search & filter interfaces, workflow tracker, payment checkpoints.	Wireframes + Clickable Prototype (Figma or similar).
M3 – Core Module Development	Candidate Management, Employer Matching, Payment Workflow, Interview Coordination.	Functional backend + APIs for core modules.
M4 – Role-Based Dashboards	Implement distinct dashboards for Receptionist, Process Agent, Accounts, Super Admin.	Functional dashboards with permissions.
M5 – Visa & Workflow Automation	Flag-based process tracking (Medical → Protector/Insurance → Visa → Passport → Flight).	End-to-end workflow tested.
M6 – Finance Module	Expense management, salary management, payment validation, financial reports (restricted).	Finance dashboard, account approval system.
M7 – Security & Privacy Compliance	Data encryption, access logs, GDPR-equivalent compliance, candidate privacy enforcement.	Security audit + compliance report.
M8 – Testing & Deployment	Unit, integration, and performance testing. Scalable deployment strategy (cloud readiness).	Deployed MINT system.

2. UI Description & Details

Receptionist Dashboard

- Candidate registration form (personal info, CV upload).
- Search/update/delete candidate profiles.
- Status view of each candidate (active, in-process, completed).

Process Agent Dashboard

- Candidate search and filtering tools.
- Match candidates with employer requirements.
- Workflow tracker (Medical, Visa, Protector, Passport, Flight).
- Upload interview feedback and employer decisions.

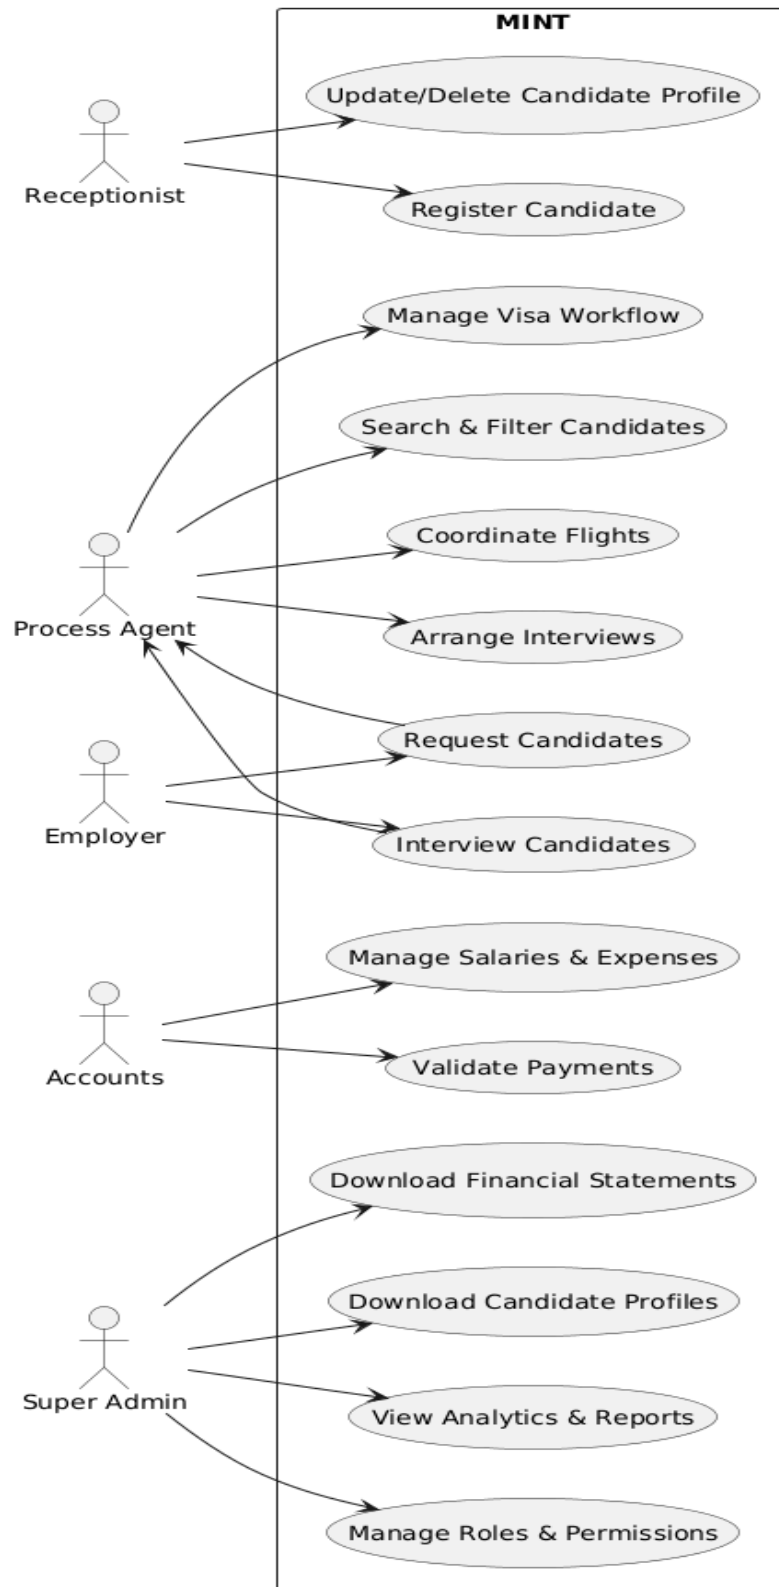

Accounts Dashboard

- View and validate payments for each workflow step (Medical, Visa, Flight, Insurance).
- Mark transactions as **Paid / Pending / Rejected**.
- Manage organizational expenses and salaries.
- Restricted: **cannot download financial statements**.

Super Admin Dashboard

- Full access to all modules.
- System-wide analytics (performance, finance, operations).
- Can **download financial statements**.
- Can **download and share candidate profiles (PDF format) with employers**.
- Role management (create/update/delete users).

3. Use Case Diagram

4. Use Case Descriptions

Receptionist

- **Actors:** Receptionist, Candidate
- **Goal:** Manage candidate records
- **Steps:**
 1. Candidate provides details & CV.
 2. Receptionist enters details into system.
 3. Candidate can later request update or deletion.

Process Agent

- **Actors:** Process Agent, Employer, Candidate
- **Goal:** Manage candidate-company matching and visa workflows
- **Steps:**
 1. Employer provides requirements.
 2. Process Agent searches profiles and exports PDF (via Super Admin).
 3. Employer decides interview type.
 4. If selected, visa process begins with payments at each stage.
 5. Workflow progresses flag-by-flag (medical → visa → flight).

Accounts

- **Actors:** Accounts Officer, Candidate
- **Goal:** Validate and approve payments
- **Steps:**
 1. Candidate makes upfront payment.
 2. Accounts verifies and updates status (Paid/Not Paid).
 3. Only after approval does workflow continue.

Super Admin

- **Actors:** Super Admin, All Other Roles
- **Goal:** Oversee entire system, reporting, and governance
- **Steps:**
 1. Monitor dashboards and analytics.
 2. Download financial statements.
 3. Approve or revoke user access.
 4. Export candidate profiles for employer requests.

5. Functionalities by Role

Receptionist

- Register new candidates with CV upload.
- Update candidate details.
- Delete candidate records upon request.
- View candidate status.

Process Agent

- Search & filter candidates.
- Match candidate profiles with employer needs.
- Manage interview scheduling.
- Initiate and track visa process with flag-based system.
- Request Accounts approval for payments.
- Coordinate flight bookings post-payment.

Accounts

- Approve/reject candidate payments for each workflow stage.
- Manage organization's salary & expense records.
- Mark payment statuses: Paid, Pending, Rejected.
- Cannot download financial statements (restricted).

Super Admin

- Full access to all modules.
- Can download/export candidate profiles and financial statements.
- Manage roles and permissions.
- Monitor analytics (finance, employee performance, demographics).
